

Coronavirus Rapid Home Test Kit - Whole Blood™ Mk II

Coronavirus (COVID-19) IgG/IgM Test Kit™

Coronavirus Rapid Home Test Kit – Whole Blood™ Mk II is a single use test kit for rapid detection of COVID-19. The test kit is designed to be used at home with complete privacy and discretion. With the prick of a fingertip and a small drop of blood, results are available in 7 minutes with accuracy exceeding 98%.

DESCRIPTION

Coronavirus Rapid Home Test Kit – Whole Blood™ Mk II is an IgM/IgG Antibody test kit. The test kit is intended for the presumptive qualitative detection of nucleic acid from COVID-19 (SARS-CoV-2) in whole blood from individuals with signs and/or symptoms of infection who are suspected of COVID-19. Testing is suitable for home users from the comfort and privacy of their own home before seeking medical attention.

Note: Test results are indicative but not conclusive and should not be used as the sole basis to diagnose or exclude COVID-19 (SARS-CoV-2) infection or to inform infection status. Negative results do not rule out COVID-19 (SARS-CoV-2) infection and should not be used as the sole basis for health management decisions. Negative results must be combined with clinical observations, patient history, and epidemiological information. If contact with the virus has been made, follow-up testing with a molecular diagnostic should be considered to rule out infection. Positive results may be due to past or present infection with non-SARS-CoV-2 coronavirus strains such as coronavirus HKU1, NL63, OC43 and/or 229E.

BENEFITS

Benefits of Coronavirus Rapid Home Test Kit – Whole Blood™ include:

- **Fast:** testing in 10 minutes (Test: 3 minutes, Results: 7 minutes)
- **Accurate:** >98% (Sensitivity >95%, Specificity >99%)
- **Easy to Use:** clear step-by-step instructions
- **Complete:** no additional equipment required
- **Portable:** test kit can be transported discreetly
- **Private:** completed in the privacy of own home
- **Liberating:** results available in minutes, not hours or days

Coronavirus Rapid Home Test Kit – Whole Blood™ Mk II is a reliable (>98% accuracy) device for home users to test for COVID-19 infection. Read package insert carefully and in full before use.

DETAILS

SKU

- DCTKBLH001

Contents

- 1 x Test Card
- 1 x Alcohol Swab
- 1 x Lancet
- 1 x Dropper
- 1 x Buffer Solution
- 1 x Step-by-Step Instructions

Dimensions

- 4.72 in x 2.36 in x 0.59 in, 1.4 oz / 12 cm x 6 cm x 1.5 cm, 40 g

Storage

- Store below 86°F (30°C) away from light and moisture
